EDUCATION

Year	Degree/Exam	Institute	CGPA/Marks
2024-2028	Bachelor of Technology (Computer Science and AI)	Newton School of Technology	8.4/10.0
2022-2023	Intermediate (Class XII)	Rungta Public School	73.0%
2020-2021	Matriculation (Class X)	Rungta Public School	85.0%

PROJECTS

Goqueue (Github) March 2026

- Built a high-performance job queue and task scheduler in **Go**, asynchronously executing tasks at 1,000+ jobs/sec.
- Architected a dual-layer design with **Redis** for fast queuing and **PostgreSQL** for durable state tracking and consistency.
- Implemented High, Normal, and Low priority queues, future job scheduling, and configurable retries across **Go** workers.
- Exposed a CRUD API with **Gorilla Mux** and graceful shutdown, containerized with **Docker**

Auramarket (Github) (Demo) October 2025

- Built a full-stack e-commerce platform with **Next.js**, **Express**, and **Postgres**, serving a catalog of 100,000+ products.
- Implemented **JWT** authentication and access control (Admin/User) in **Express**, securing cart and checkout flows.
- Designed the data layer with **Prisma** and **PostgreSQL**, enabling full CRUD for products, users, and orders.
- Developed search, filtering, and dynamic loading with **Next.js** and **TailwindCSS**, plus an admin dashboard.

Budget Tracker (Github) (Demo) May 2025

- Built a personal finance management tool with **Firebase**, supporting budget categories and real-time expense tracking.
- Developed interactive spending visualizations with charts, giving users instant insight into category-wise trends.
- Integrated recurring reminder alerts and real-time **Firebase** syncing, keeping data consistent across sessions.

SKILLS

- **Languages:** Python, JavaScript, TypeScript, C++, Go, Rust
- **Frontend:** React, Next.js, Tailwind CSS
- **Backend:** Node.js, Express JS, AWS, Supabase, Firebase
- **Databases & ORMs:** PostgreSQL, MySQL, MongoDB, Prisma ORM
- **DevOPs & Tools:** Docker, Git and Github, GitHub Actions, Postman
- **AI / ML:** TensorFlow, PyTorch, Hugging Face, Transformers, Claude Code

RELEVANT COURSEWORK

- **Core CS:** Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks
- **Databases & Backend:** Database Management Systems (SQL), Web Development, API Design, System Design Fundamentals
- **AI / ML:** Machine Learning, Deep Learning, Reinforcement Learning, Probability & Statistics
- **Foundations:** Discrete Mathematics, Linear Algebra, Computer Architecture

ACHIEVEMENTS

Finalist, Meta × PyTorch × OpenEnv Hackathon 2025

- Reached the finals out of hundreds of teams in a hackathon co-organized by Meta, PyTorch, and OpenEnv.
- Built a custom RL environment with **OpenEnv** simulating 911 dispatch to evaluate LLM dispatch accuracy, severity classification, and dynamic rerouting of low-priority units.
- Fine-tuned **Qwen2.5-1.7B** with **SFT** and **GRPO** using **Unsloth**, and deployed it on **Hugging Face Spaces**.
